

Replace w/
ART 19

Claims

1. A portable terminal comprising:
 a battery attachment portion to which a detachable
5 battery is attached;
 an information recording medium storage portion for
 storing in a detachable manner an information recording
 medium in which information is recorded; and
 a battery housing portion, for storing the battery,
10 which is constituted by the battery attachment portion and
 the information recording medium storage portion,
 wherein the information recording medium storage
 portion is disposed in a state of exposing one major
 surface of the information recording medium.
15
2. The portable terminal according to claim 1,
 wherein the battery housing portion is provided in
 a housing of an almost rectangular parallelepiped, and
 wherein a second information recording medium
20 storage portion, for storing in a detachable manner an
 information recording medium in which information is
 recorded, is disposed in adjacent to the battery housing
 portion along a longitudinal direction of the housing
 within the housing.
25
3. The portable terminal according to claim 2, further

REPLACE by
ART 19.

comprising:

the housing;

a second housing; and

a hinge portion for coupling the housing and the
5 second housing in a manner of capable of being folded.

4. The portable terminal according to claim 2 or 3,
wherein each of the information recording medium
and the second information recording medium has an almost
10 rectangular parallelepiped shape,

wherein the information recording medium storage
portion is disposed in a manner that a longitudinal
direction of the information recording medium coincides
with a direction orthogonal to the longitudinal direction
15 of the housing, and

wherein the second information recording medium
storage portion is disposed in a manner that a longitudinal
direction of the second information recording medium
coincides with the longitudinal direction of the housing.

20

5. The portable terminal according to one of claims 2
to 4,

wherein the housing has an opening portion for
storing the second information recording medium within the
25 second information recording medium storage portion, and

wherein the opening portion is covered by an

ART 19

open/close lid in a manner that the lid moves in a direction orthogonal to a housing direction of the second information recording medium and rotates in a freely closing and opening manner with respect to the housing.

5

6. The portable terminal according to one of claims 1 to 5,

wherein the information recording medium storage portion and an input/output portion for inputting and
10 outputting information are disposed in an overlapped manner at a side of the information recording medium opposite to a surface of the information recording medium being exposed.
